TRIZ Innovation Situation Canvas

What is the Problem?

What is the system in question?

What would be the ideal outcome?
What would be the ideal system?

What are the causes of the problem?

What are the parts / components of the system?

How does the system work?

Which resources are already at hand?

What were previous solution attempts?
Why didn't they work out?

What are the surroundings / the environment of the system?

What are the consequences if the problem is not solved?

How could the problem be circumvented?

What are allowed changes, what must remain unchanged?

What are assessment criteria for possible solutions?

Are there similar problems in other areas?
How were they solved there?
